

Sai Metal Traders - Product Specifications

Indicative product categories for international metal scrap trading. Final acceptance, pricing, and shipment terms depend on grade, contamination, recovery, quantity, inspection, documentation, freight, and destination requirements.

Category	Typical Materials	Buyer Notes
Aluminium	UBC cans, 6063 extrusion, wheels, sheet, cast aluminium	Require photos, packing details, attachment/contamination check
Copper	Bare bright, #1/#2 copper, busbar, granules, insulated wire	Price varies by copper recovery, insulation, purity, and form
Stainless Steel	304, 316, 430, solids, sheets, pipes, turnings	Nickel content and grade confirmation are critical
Brass	Yellow brass, red brass, 360 brass, plumbing brass, turnings	Mixed brass and clean brass priced differently
Nickel Alloys	Nickel scrap, Inconel, Monel, Hastelloy, high-temp alloys	High-value material requires grade verification
Ferrous	HMS 1 & 2, shredded steel, cast iron, industrial steel	Container/truckload specs required
Lead & Battery	Lead scrap, battery material where legally acceptable	Must comply with destination rules and hazardous material controls
Mixed Industrial	Motors, radiators, transformers, e-scrap, zinc/tin materials	Inspection and separation recommended before pricing
